

How to roughly estimate your ATAR – Class of 2017

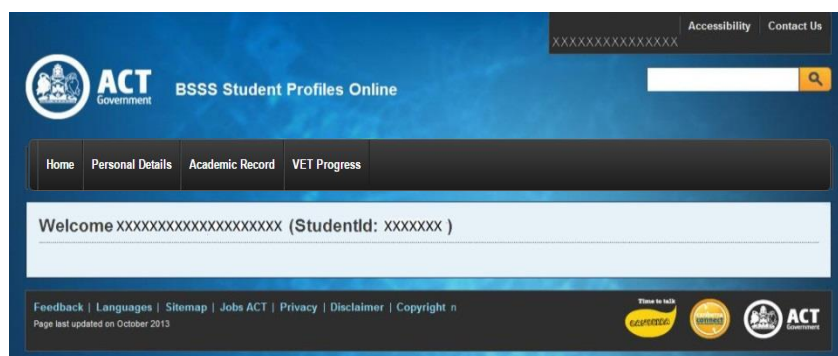

1. **Get a copy of your Academic Record (see instructions below if you haven't received your College copy)**

If you attend an ACT government college, open any browser and go to the URL: <https://student-profiles-sso.ed.act.edu.au/>. If you are using a computer at college when you do this, it will log you in automatically. If you are not using a computer at college, you will get a login screen. Login with your schoolsNET logon (preceded by ACTEDU\) and the same password you use at college.

For example: Logon: ACTEDU\9876543

Password: XXXXXXXXXX

You will then see a screen like:

Select 'Personal details', 'Academic record' or 'VET Programs' to view your information.

Using the scores on your academic record:

2. **Average each of your unit scores to come up with a course score estimate for each.** This will need to be a weighted average where you have Q units e.g. if you have two Q units and an S unit so far in a course then do the following: $(.5 \times Q1 + .5 \times Q2 + S1) \div 2$
3. **Identify from your study package which courses will be Majors and which courses will be Minors.**
4. **Identify your three best Majors.**
5. **Identify your next best Major **OR** Minor.**
6. **Calculate your Aggregate Score.**
 - a. Multiply each of the course scores from your best three Majors by 2.
 - b. Multiple the course score of your next best Major or Minor by 0.6 and then by 2
 - c. Add all the totals together and this will be your Aggregate Score

7. Look up your Aggregate Score in the table on the next page:

Table 7: ATAR, Average Aggregate Score and Average Scaled Course Score

ATAR	Average Aggregate Score	Average Scaled Course Score
99.95	801	214
95.0	665	177
90.0	621	162
85.0	587	153
80.0	559	149
75.0	535	145
70.0	513	137
66.0	494	133
60.0	462	124
55.0	432	115
50.0	384	104

WARNING

Your unit scores are **estimates** of how your performance in your subject ranks against the rest of the ACT where 70 is the ACT average and 12 is the ACT standard deviation. Your actual unit scores won't be accurate until they are scaled by the AST. The instruction above that pertain to the aggregate scores is an **estimate** of how the aggregate score is obtained. So these instructions direct you to estimate based on estimates, which is unreliable. The ATAR estimate you obtain here gives you only an indication of how you are going and **it is not a prediction**.

Please see Di or Kirstin in Careers if you are unclear about any of this and they will help you or direct you to the right place. Make an appointment if you wish to discuss your ATAR further.
